Issue Type	Key	Summary	Description	Assignee	Reporter	Priority	Status	Created	Updated
Test Fault	<a href="#">SFS-693</a>	Iteration 4: Cannot upload a journal from an Excel Spreadsheet	The process to upload a journal is not working, either when creating a new run control or when using an existing run control. When the user selects an existing run control, the Add button is grayed out, and the delete button does not remove the file. When a new run control is used, the user gets a message that states "AddAttachment Failed"	Team: SFS DBAs	Jeff Kuhn	Critical	Open	1/3/2008 6:19	1/3/2008 7:40
Test Fault	<a href="#">SFS-687</a>	Iteration 3 - Error when saving Team Detail Page in Project Costing	See attached document (proj_detail_save_error.doc) which shows the message I receive when trying to save the team detail page in project costing. Does Grants get this message too? Does anyone know what the cause of this is?	Tina Parman	Tina Parman	Major	Open	12/20/2007 10:06	12/26/2007 13:24
Test Fault	<a href="#">SFS-686</a>	Iteration 3 - Cannot run process get tablespace error	I get the following error when trying to run a withholding process in Iteration 3 - REL1  Please advise	Tina Parman	Tina Parman	Major	Open	12/20/2007 8:01	12/22/2007 18:59
Test Fault	<a href="#">SFS-679</a>	Iteration 3 - Job FS_JGEN does not create journal line to correct account for Travel & Expense journals	Dale:  We are seeing the same problem as in SFS-369.  Instances 3511818 and 3511933 created the journal entries with account 3999 instead of 7100. I am wondering if this is due to the ascending indexes problem we had in production. Since not all generated journals are having the problem. This is for EXACC80152, 80153 and 80155  Please transfer to travel and expense if this belong there.	Richard Linton	Janet Larson	Major	Open	12/17/2007 15:51	12/18/2007 14:19
Test Fault	<a href="#">SFS-663</a>	ACH: PeopleSoft URL now goes to a white page	The url for the web side of People Soft is no longer working for the data vault. This means that Martha cannot set-up security nor can Rachel complete development.  Has cache been cleared? Could this be a space issue? Perhaps the trace for the email problem is consuming space.	Parag Kansara	Colleen Sims	Critical	Open	11/30/2007 15:30	12/26/2007 15:43

Test Fault	<a href="#">SFS-658</a>	Iteration 3: False program_code error on salary maintenance page (Update_Suspense) in Release 1	Madison reports "Invalid Value" error when attempting to change program_code from 5 to 4 (see attachment). Ernie Mergen confirms the problem for this and another Madison transaction. He tried several other business units without problem, however. I copied the transaction data for the reported UWMSN case from REL 3 to SFPRDEV and am unable to replicate the problem.	Katie Chase	Neal Deunk	Major	Open	11/29/2007 7:27	1/3/2008 7:04
Test Fault	<a href="#">SFS-605</a>	Iteration 2: PI Suspense editing is not working properly when PRJ Project code is entered for a coding change	see attachment	Neal Deunk	Ernie Mergen	Major	In Progress	10/26/2007 11:06	12/26/2007 16:48
