

**THE UNIVERSITY OF WISCONSIN  
CENTRAL DATA REQUEST – CODE BOOK**

**CURRICULAR AREA CODES TABLE**

**Overview**

Sp/99

The Curricular Area Code is a systemwide coding structure which provides a common identifier for each curricular area in which the campuses offer courses. The codes are based upon the HEGIS Taxonomy of Academic Disciplines; codes have been added as required for curricular areas within the University of Wisconsin System which do not have applicable HEGIS numbers.

A list of the Curricular Area Codes and a crosswalk table for each campus have been developed. Each crosswalk table contains lists of campus departments and Unit, Division, Department, Sub-department (UDDS) Codes. The campus departments are listed alphabetically within one of the six discipline groupings. A Curricular Area Code has been assigned to each registrar department on a one-to-one basis.

It is possible that a particular registrar department may have been omitted from the listing, or one which no longer offers courses may have been included. In either of these cases, the crosswalk table must be updated. Should the campus wish to change the Curricular Area Code listed to another code, the campus should request the change from System Administration.

The association of Curricular Area Codes with UDDS Numbers provides the means of relating curricular activity to budgetary units (with the attendant faculty and funding); i.e., History (448 in Madison) is equated with History (A-48-38). Some UDDS numbers may not represent a sub-department or department, but rather division. This occurs because the budgetary match is more appropriate at a higher level. For example, the registrar department number for the School of Nursing at Madison matches the UDDS for the entire school, A-54----; i.e., the budgetary division rather than budgetary departments or sub-departments. In other cases, the registrar numbers of some smaller departments have been matched to a UDDS belonging to another department; i.e., Contemporary Trends (269 in Madison) with Political Science (A-48-72). This is done to provide a place to put the credits without losing them, because the smaller departments have no budget. If the number selected is inappropriate, the campus must notify System Administration. In some cases, the full UDDS is not printed. For example, the UDDS on the table for Agricultural Economics at UW-Madison is A-07-33, not A-07-3300. The reason is that relevant budget for the credit-producing department, Agricultural Economics, appears under A-07-3300 and A-07-3301. In order to collect all the budget appropriate to Agricultural Economics, credit must be associated with the shortened A-07-33.

The UDDS numbers, and thus the registrar departments, have been grouped by discipline area. The six discipline areas are: I. Social and Behavioral Sciences, II. Humanities, III. Physical and Engineering Sciences, IV. Agricultural and Life Sciences, V. Non-Clinical Health Sciences, and VI. Clinical Health Sciences. Departments which would normally fall into separate discipline groups are combined in one discipline group if they are both matched to the same UDDS number, e.g., Geography (Social Science) and Geology (Physical Science).

It is important that all coding be valid. Should a unit determine that a Curricular Area Code, UDDS designation or discipline area designation is incorrect, System Administration should be notified at once. These designations play a vital role in the evaluation of the fiscal support for a campus as well as having impact upon many other analytical studies.
