System Usage Statistics
(Figure B-18)

PURPOSE: This screen is used to enter selection criteria to retrieve and display usage data for the Transfer of Courses - Telnet Interface Section of TIS.

FUNCTION NOTES:

The upper section of this screen lists key fields used to retrieve the TIS usage data. The lower section displays the information associated with the selection criteria entered above.

To retrieve a screen of usage data, enter an Institution ID and/or a Year/Term and press ENTER. If the Institution field is left blank, usage at all institutions will be displayed. If the Year/Term field is left blank, usage for all year/terms will be displayed. You may place the cursor on a field and press F1 to get a list of possible entries for Institution and/or Year/Term and select from the list.

The lower section of the screen displays the specified usage statistics. The faculty/staff and student/other subcategories are based on self-identified information provided by users when they initially log into TIS. "Authorized" users are staff who have assigned logins that allow them to perform additional TIS functions, such as accessing the TIS On-line Maintenance System.

DATA ELEMENTS:

The following data elements are used to retrieve usage statistics:

Institution
Year/Term

The following TIS usage information is displayed:

Users: The number of user logins to the TIS "Student" and "Maintenance" systems.
Reports: The number of TIS Equivalency Reports generated from the "Student" and "Maintenance" systems.
Queries: The number of uses of each type of query within the TIS "Student" system. Subtotals are based on whether the specified Courses, Department or GE category were associated with the "From" or the "To" institution.
Evaluations: The number of users who answered questions within the on-line evaluation and the number who did not.
Tutorials: The number of users who accessed the TIS on-line tutorial - either the "Introduction to TIS" or the "Practice Using and Operating TIS" section.

FUNCTION KEYS:

F1 (Help) Provides field or screen help depending on cursor position.
